#### DETAILED ACTION

## Response to Amendment

The amendment filed on May 21, 2007 has been considered but is ineffective to place the application in condition for allowance.

# Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are written more in the form of an Abstract as opposed to a proper method claim. For example, regarding claim no side, i.e., opposite or any other has been positively recited, the opposite sides of what? Additionally, "it" (line 10) renders the claim indefinite as it is not clear what "it" is used to refer to; Examiner suggests clear and positive recitation of structure to what it refers, i.e., --said clamp—. Similar confusion results regarding claim 6.

Regarding claim 1, lines (12-14), does the longitudinal axis extend on both sides of the boundary surface or does the reversible knife extend on both sides of the boundary surface?

Similar confusion results regarding claim 6. Clarification is required

Regarding claim 1, lines (14-16) "which" locking piece is arranged to form a fixed part of the reversible knife or the counter knife. It is not clear as to whether the locking piece is an

Application/Control Number: 10/500,618 Page 3

Art Unit: 3725

integral part of either the reversible or the counter knife or if the locking piece is merely fixed relate to either the reversible or counter knife. Similar confusion results regarding claim 6.

Clarification is required.

With regard to claim 6, it is not clear what "they" refers to, Examiner suggests clear and positive recitation of what structure/element "they" refers. Clarification is required.

As it relates the counter surface (clms. 1, 6), it is not clear how the acute angle  $\alpha$  is formed, i.e. counter surfaces of what?

There is no antecedent basis for the following"

"the longitudinal axis" (clm. 1, 6), Examiner suggests, --a longitudinal axis—

"the boundary surface", (clm. 1, 6) Examiner suggests, --a boundary surface—

Examiner notes the above listing of 35 U.S.C. 112 rejections is not conclusive, Applicant is required to review of all of the claims for compliance to eh 35 U.S.C. 112 so as to enable a clear understanding of the claimed invention. Claims 1-9 have not been further treated on the merits however, as presently presented the claims are not deemed allowable.

## Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Page 4

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shelley Self whose telephone number is 571-272-4524. The examiner can normally be reached on 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris Banks can be reached on 571-272-4419. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
